

RED TRIDENT INC

SECURING INDUSTRIAL INFRASTRUCTURE

THE RED TRIDENT ADVANTAGE We are automation and cybersecurity experts that come from production and manufacturing. We understand how to build security into operations... not on top of it.

ASSESS Not all assessments are created equal and no two customers are the same. We have built a set of assessments that match to our customers maturity levels. No matter your maturity we can help you understand your current state and help you develop a plan to get your organization to the security posture you require.

REMEDiate There are a lot of intricate details that go into designing and remediating an OT environment. Red Trident has immense experience on detailing and implementing solutions for even the most critical operations and can also train your workforce if desired.

MONITOR OT systems are unique and so are the requirements to monitor and identify a potential compromise. If your team does not have the skills and expertise to monitor your OT environment allow our OT security team to be an extension of your team and monitor your environment for you.

RESPOND Our response services are matches to our customers needs. No matter if you need to be better prepared for a cyber incident, are concerned you may have been breached and need someone to confirm it, or you know you have an incident and need help in handling it for your OT systems. Our experts are prepared to support you at a moment's notice when you need it most. Red Trident also partners with some of the best IT incident response teams to provide our customers with holistic incident response coverage in both IT and OT
